Dear Mr. Devanney;

Attached please find a copy of the NOAV issued to Antero Resources in July 2010 related to odors at the Watson Ranch pad.

NOAVS are generated internally in a "forms processor" and data is pulled through COGIS for public access. I am not sure why the COGIS database could not pull all of the data from this NOAV. I do apologize for not providing this information sooner. Shaun had notified the database group of the issue but they have not responded and I did not follow up. Also Dave Neslin has asked me to address this last week but I was in Rifle and was not able to generate a pdf document of the NOAV.

Antero has submitted their response which will be reviewed. I will forward their documents and COGCC response to you directly so you will not have to rely on COGIS for this issue. Please let me know if you have any questions or need additional information.

Regards,

Margaret Ash
