Subject: Another odor complaint -- Battlement Mesa -- Watson pad

Greetings:

A complaint was left on the Rifle office machine this a.m. It was from Bonnie Smeltzer concerning odors, which she thought were from the Antero Watson pad. The complaint form (Form 18) should be in/on the COGIS/COGCC system as document # 200262060 (I decided to assign it to API 045-19095, somewhat arbitrary, but it 'helps' track if we glue an API # onto it).

I left a message (which included the recorded complaint) on Shaun's machine, and played it for Mike Longworth (in the field conducting UIC inspections).

I believe Jerry Alberts wanted me/us to inform him of any such complaints and such when we receive them. Ms. Smeltzer's phone # is 285-9386.

I called Ms. Smeltzer's number and left a message - stating that Antero is conducting air-quality-monitoring-sampling at that location tomorrow (if I recall what Jerry and I discussed earlier this week correctly), and that someone from our field inspection staff should, as time and other commitments allow, be in contact when they can.

Regards,

Jay Krabacher
