This form is to be completed whenever a Sundry Notice is submitted requiring detailed report of work to be performed or completed. This form shall be transmitted within 30 days of work completed as a "subsequent" report and must accompany Form 4, page 1.

5. DESCRIBE PROPOSED OR COMPLETED OPERATIONS

- 1) Updated operator well sign has been installed.
- 2) All drums have been removed for recycling from the well site.
- 3) GPS co-ordinates have been taken and are included.
- 4) Flow lines to the production tank have been disconnected. The anticipated production will be low enough that treatment of the gas is not anticipated at this time.
- 5) A small amount of water/oil/condensate was mistakenly blown onto the ground during blow down procedures. The affected soil has been consolidated into a pile of approximately 10-15 cu. yds in volume. This soil has been sampled by Stewart Environmental Consultants, Inc. to determine the type and level of contamination. This information will be reported on subsequent Sundries as well as being included on an application for the disposal form for the Moffat County Landfill. This analysis is expected to be available from the testing labs by Sept. 20 2010. A determination of acceptance by the Moffat County Landfill should be available within approximately 1 week of this date. After approval by the County, removal of the material from the site will be concluded with the week after this approval. A copy of all manifests and receipts of acceptance will also be included in subsequent reports.
