Subject: RE: GM 34-32 - Complete Lower Cameo & Cameo

Chris,

Based on my review of your second post-remediation CBL for this well, dated 11/19/2010, it appears that you have adequate cement coverage above the Lower Cameo (7066' – 6808') and Cameo (6766' – 6581') objectives to proceed with these completions.

Thanks,

David D. Andrews, P.E., P.G.

Subject: GM 34-32 - Complete Lower Cameo & Cameo

Dave,

Per the latest squeeze results, I've put together a completion procedure for the LC & Cameo stages for the GM 34-32. I'm very confident we can complete these two stages with no issue specifically due to the upper bond we achieved on the last squeeze.

We are schedule to complete the Lower Cameo November 30th and the Cameo Dec. 3rd.

The CBL's are on the FTP site. Please let me know if you have any heartburn with this plan of action.

Regards,

Chris Caplis
