Subject: RE: Cozzens Spill 1944356 NFA Request

Randall,

Based on the information submitted, COGCC requires no further action at this time in regard to the release and remediation performed at the subject location. The spill report (tracking #1944356) has been changed to closed status in the Colorado Oil & Gas Information System. Please retain a copy of this email as verification of COGCC concurrence with the closure request.

Please give me a call if you need any additional information.

Thanks,
John

Subject: Cozzens Spill 1944356 NFA Request

John / Nancy:

Attached are documents related to the spill/release at the Cozzens tank battery located in the SENW Section 9 – T6N – R65W that occurred on 6/28/09. A Form 19 was previously submitted on 7/7/09 (Spill #1944356). Due to an oversight, confirmation soil samples were not collected for laboratory analyses prior to site restoration. As a result, soil samples were recently collected from six locations within the excavated area. Lab results indicate compliance with Table 910-1 standards. Based on these results, PDC is requesting No Further Action.

Let me know if there are any questions or concerns. My apologies for this oversight.

Randall H. Ferguson

Subject: Weld and Yuma County Spill Report Follow Up

Randall,

I'm helping John Axelson review old files, and have identified several projects that I have questions about.

125-10614, Sec 16 T4S R42W, KNODEL 13-16 1/19/09, 19# 1942435, "samples collected on April 7 and May 26". These analyses aren't in COGCC data base. Have the reports been submitted?

123-19231, Sec 6 T5N R63W, SKURICH ROTH 31-6 5/20/09, 19# 1943782, "sample #8 was hot", waiting for further excavation and confirmation sampling. Was this excavation completed? Have reports been submitted?

123-29770, Sec 9 T6N R65W, COZZENS 90 6/28/09, 19# 1944356, "clean up is still in progress". Was this excavation completed? Have reports been submitted?

Thanks for your help with these. Please call if you have any questions.

Nancy Prince, CHMM
