Hi Arthur,

You can add the soil info to the 2A.

Also the COA's are ok.

Thanks,

Georgina Kovacik

Georgina,

The COGCC is reviewing the Form 2A (#400112977) for the Pioneer Bucksnot 41-35 site, located in the NENE Sec 35 T32S R66W Las Animas County, Colorado. The COGCC requests the following changes regarding the data submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA)

1. **Soils:** The Bucksnot 41-35 well site appears to contain two soil types, the reported Trujillo-Sandy Loam, 9 to 25% slopes and the unreported Gulnare-Allens Park Complex, 5 to 25% slopes.
  - The COGCC proposes the addition of the -Allens Park Complex, 5 to 25% slopes to the 2A form.
2. The following conditions of approval (COAs) will apply at the Bucksnot 41-35 TR location:
  - Operator must implement site-specific best management practices in accordance with good engineering practices, including, but not limited to, construction of a berm or diversion dike, site grading, or other comparable measures, sufficient to prevent a release of drilling, completion, produced fluids, or chemical products from migrating off of the oil and gas location.
  - Prior to converting the drilling pit for use as production pit Pioneer shall submit an Earthen Pit Report/Permit Form 15 to the Director for approval in accordance with rule 903.a.. No production water shall be placed in the pit without a pre-approved form 15.

These COAs are consistent with Pioneers proposed oil and gas operations, however, COGCC would appreciate your concurrence with the COA prior to passing the OGLA review.

If you have any questions or concerns, please do not hesitate to contact me.

Thanks,

Arthur
