**Subject:** Dempsey 31-22 Remediation  
**Attachments:** DOC.PDF

Margaret,

James informed me you wanted to know our plan of action and possible timeline for work that is needed at the Dempsey 31-22 location. He provided me with the attached plan, which has been approved by the landowner. However, anticipated work start date is somewhat variable due to the pit closure process, which can take anywhere from a few weeks to a couple of months. We first have to have soil samples collected from the pit and native areas like we normally do for pit closures, wait for results to come back from the lab, I'll submit the Form 27 to Peter (or to you if you'd prefer), and wait for approval before we will move equipment to the location to get all the work done. Soil samples should be collected by the end of the week I am told. If you have any questions, feel free to contact James or myself.

Thanks,

David Castro
