Operator must implement site-specific best management practices in accordance with good engineering practices, including, but not limited to, construction of a berm or diversion dike, site grading, or other comparable measures, sufficient to prevent a release of drilling, completion, produced fluids, or chemical products from migrating off of the oil and gas location.

Due to the Gulnare soil type the following will apply: Location is in a sensitive area because of potential for adverse impacts to ground water/surface water; therefore all pits will be lined.

The site specific BMPS provided by XTO Energy for Erosion control and storm water management should be implemented immediately after pad construction.

Permit	I spoke with Al Trujillo Colorado Department of Wildlife (CDOW) about XTO Energy's proposed locations in the Bosque Del Oso State Wildlife Area (SWA). Al Trujillo (CDOW) and his staff are aware of XTO Energy's plans for the proposed locations and further, there is an existing SUA in place for operations in this area; I also spoke with Kyla Vaughn (XTO Energy Inc.) and they are currently operating in the Bosque Del Oso SWA under the original SUA executed by Williams and CDOW.
