Subject: Nordman Estate 10-2 2A Document #1633025, Renegade

J.B.,

The COGCC is reviewing the Form 2A (#1633025) for the Renegade Nordman Estate 10-2 location, located in the NWNE Sec 10 T6S R64W Elbert County, Colorado. The COGCC requests the following changes regarding the data submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA).

1. Construction: Land spreading is not an acceptable form of mud disposal on range land. Please provide an alternative method of mud disposal that is allowed under COGCC rules 907.d and 1003.d (2).

[As we discussed, we did not intend to land spread the drilling mud on the range land. We have 2 miles of lease road leading to this location, and intend to use the drilling mud as an amendment to improve that access road.](#)

2. Water Resources: A review of water well permit # 196463 located approximately 807 feet to the north of the proposed location has a water level of 32 feet. The stated water level is 40 feet.

- The form 2A should have the depth to water amended to 32 feet.

[The water well is downhill from our location. The 40' water level is the approximate distance/depth to Box Elder Creek to the east.](#)

If you have any questions or concerns, please do not hesitate to contact me.

Thanks,

Arthur
