This form is to be completed whenever a Sundry Notice is submitted requiring detailed report of work to be performed or completed. This form shall be transmitted within 30 days of work completed as a "subsequent" report and must accompany Form 4, page 1.

5. Well Information:

Well:	Juniper 2-16 (M1E)	PBTD:	5618'
TD:	5657'	Surface csg:	1529'
Prod csg:	5655' with TOC @ 4000'	Tubing:	163 jts set at 5183'
Int casing:	3999' with TOC at 3250'		

History:

Intermediate casing built up to 800 psi; blows down in a few minutes.
 Per Kristin Fraser 10/24/08: 10 psi on bradenhead, bled off instantly.

1/22/09: After a 90 day venting period; the intermediate casing pressure is 20 psi. We are removing this well from the venting list. David Andrews verbally approved this request on 1/22/09.

9-15-10: Encana requests approval to open and vent the bradenhead on this well indefinitely. A 7-day pressure build-up will be obtained and, if that pressure builds to 150 psi or greater during that time, it will be reported on a Form 17. All 7-day build-up pressure data will be reported in our annual report no later than November 1st.
