Attachments: CO Hydrology Map.pdf

Rick,

Attached is the required hydrology map. In addition please see my response to your comments below.

1. A skim tank will be used if a production pit is required for this location. Please add it to the form 2A.
2. I approve you changing the sensitive area determination from yes to no.
3. See attached.
4. SingleTree understands the form 2A will be approved conditional to the photographs required within 12 months and also understands a Form 15 is required prior to a production pit being installed on location.

Thank you.

Tony Markve

Subject: CINN 44-35 - COGCC review Form 2A (Doc 400136612) for SingleTree Resources, Inc.

Hi Tony,

The COGCC is reviewing the Form 2A oil and gas location assessment for the CINN 44-35 well location in the SESE Sec35 T11N R54W, Logan County, and requests the following changes or clarifications to the Form 2A submitted by SingleTree Resources, Inc:

- 1) **Facilities:** If a production pit will be on location, will a skim tank or skim pit or similar vessel be used also? Please verify whether a skim tank or skim pit will be used and I will add it to the Form 2A.
- 2) **Water Resources:** Please approve me changing the Rule 901.e. Sensitive Area Determination from Yes to No. This determination is typically made at the request of the Director and requires extensive site-specific data be supplied. Note that the Sensitive Area Decision Tree is no longer a part of the Rules.

- 3) **Hydrology Map:** The Hydrology Map must be a topographic map that shows surface waters and riparian areas within 1000 feet of the proposed location. Even if surface water is not present, please revise the Hydrology Map to include topographic contours. You can email me the revised map and I will attach it to the Form 2A.
- 4) **Conditions of Approval:** Please indicate SingleTree's concurrence with the following Conditions of Approval:
 - COA 1:** Since the Land Use is Rangeland, a reference area map and photographs must be submitted. Therefore, the following condition of approval will apply to the Form 2A: "A Reference Area Map and Reference Area Photographs must be submitted within twelve (12) months of the approval of the Form 2A."
 - COA 2:** "A Form 15 Pit Permit must be approved prior to use of a production pit at the location."

Please contact me with any questions regarding this Form 2A.

Best Regards,

Rick Allison, P.G.
