Thanks Arthur

The Town's main concerns with the drilling are the roads and of course the residents. Will Javernick be notifying the people within a certain distance of the well site? I have asked him to post a sign at the entrance to the site, off of the paved road. We have a schedule town hearing for anyone to voice their concerns (March 15). We have requested a culvert be replaced at the entrance to the site.

If you are working on the application for Pine Ridge Oil, I have concerns. They have and are planning more drilling at our borders. They use the Town's roads, blocking roads, putting up signs and never notifying the Town when they are coming through. In fact I have reports today of them blocking traffic with their big rigs. Their trucks access our roads continually and a stop sign should be put up coming off of the site road to our paved road (Coal Creek Drive.) This is a chip seal road and the heavy weight of the trucks is tearing up our roads. At this time we do not have a weight limit on trucks for our roads, but we are working on it.

Thanks for keeping us informed.

Connie,

I received the above referenced Form 2A earlier today and have begun the review process. The location falls within the boundaries of Coal Creek and I would like to get your input prior to completing the review. I am specifically interested in any concerns the Town of Coal Creek has in regards to the location that may be addressed during the 2A process. Please feel free to contact me with any questions or concerns that you may have regarding the Chandler Creek location.

Thanks,

Arthur
