Subject: ALLRED 25-44-8-60 - COGCC review Form 2A (Doc 400145214) for Carrizo Oil and Gas

Hi Venessa,

The COGCC is reviewing the Form 2A oil and gas location assessment for the ALLRED 25-44-8-60 well location in the SESE Sec25 T8N R60W, Weld County, and requests Carrizo's approval of the following changes to the Form 2A:

- 1) **Water Resources:** The nearest surface water feature is an intermittent drainage and pond located approximately 2150 feet northeast of the proposed location. Please approve me changing the distance to nearest surface water to 2150 feet.
- 2) **Conditions of Approval:** The following conditions of approval will apply to the freshwater reserve pond at the location:
  - COA 1:** The fresh water storage pit shall include signage that: identifies the pit use as a freshwater-only pit, prohibits placing E&P Waste in the pit, and lists each well that the pit will serve.
  - COA 2:** Operator is prohibited from allowing any fluids to flow back to the fresh water Frac Pit.
  - COA 3:** The freshwater storage pit shall be constructed and maintained to prevent terrestrial wildlife or livestock entrapment.
  - COA 4:** Notify COGCC OGLA Specialist Rick Allison at [rick.allison@state.co.us](mailto:rick.allison@state.co.us) 48 hours prior to construction of the frac reserve pit.

Please contact me if you have any questions regarding this Form 2A.

Best Regards,

Rick Allison, P.G.
