Rick,

1) Water Resources: I approve you changing the sensitive Area Designation from No to Yes, as the static water levels of multiple water wells indicates the likelihood of shallow ground water.

Thank you !

Nanette Lupcho

Subject: CRITTER CREEK 32-10H - COGCC review Form 2A (Doc 400141599) for EOG Resources, Inc.

Hi Nanette,

The COGCC is reviewing the Form 2A oil and gas location assessment for the CRITTER CREEK 32-10H well location in the SESW Sec10 T11N R63W, Weld County, and requests the following change to the Form 2A:

1) Water Resources: There are multiple water wells located north of the proposed location that are screened relatively shallow. While not all wells have static water level information, the number of wells 35 feet or shallower, indicate the likelihood of shallow ground water in the area. Most of these wells are located in Section 4, 9 and 10. Therefore, please approve me changing the Sensitive Area Designation from No to Yes.

Please contact me if you have any questions regarding this Form 2A.

Best Regards,

Rick Allison, P.G.
