Construction	during construction of this location, wattles will be installed at the toes of soils stockpiles, and strategically along the pad access. A culvert will be installed in the access
Final Reclamation	during final reclamation, equipment will be removed, the pad will be completely recontoured with subsoils and topsoils being appropriately redistributed, seeded and mulched. The wattles and culvert will be removed
Storm Water/Erosion Control	inspections will be performed at prescribed intervals, and mitigation will take place as necessary
Drilling/Completion Operations	the culvert and wattles will remain in place during this period
Interim Reclamation	if needed, the wattles will remain at the toes of the soils stockpiles. a large portion of the pad will be recontoured, with subsoils and topsoils redistributed and seeded... the culvert will remain in the pad access until the access itself is reclaimed
