Flare stack will be removed after a gas line is installed. One of the two heater treaters will be removed when production volumes fall below the capacity of a single heater treater. Depth to ground water determined from Water Well Permit #37124, which is the closest water well per the COGCC GIS. This water well lies to the west of the location in Section 9 T10N R63W. The closest surveyed water well per the Location Drawing is located to the east of the location in Section 11 T10N R63W. The closed loop system utilized to drill the referenced well is a semi closed loop system. Drilling mud and cuttings will be remediated prior to burial onsite.
