Lisa,

The COGCC is reviewing the Form 2A oil and gas location assessment for the SLICK ROCK 30-14-7-60 well location in Lot4 Sec30 T7N R60W, Weld County. The submitted Reference Area Picture appears to be of disturbed, possibly burned, ground. Both the Location Pictures and the Reference Area Pictures are very dark and it is difficult to determine the intended basis for reclamation. Can Carrizo provide the following additional information?

1. Please verify that the reference area is on undisturbed ground.
2. Please submit revised Location Pictures and revised Reference Area Pictures to aid in COGCC's review of this Form 2A.

3. Please provide a location for the reference area – either a Reference Area Map, or a statement that “the Reference Area is immediately adjacent to the location in the (north, east, south, west) direction” if that is the case.

Please contact me with any questions regarding this Form 2A.

Best Regards,
