Sarah,

I will place a copy of this email in the well file and pass it on to our production group to correct the production reporting error.

Thanks for your help.

Hi Dennis,

I have not been able to find any type of documentation to prove that the Trail Canyon #2-5 well was re-entered after the 1996 P&A. To clean up this well's record, do you need us to re-report the months that show the status as being SI or PR?

Please let me know what you need from us to get this cleaned up!

Thanks!
Sarah

Hi Dennis,

This is the first I have heard of the Trail Canyon #2-5 well potentially producing AFTER the P&A in 1996. We are currently trying to track down the "cementing contractor's job summary" to submit with the Form 6 Well Abandonment Report. I will continue my research and keep you posted!

Thanks!
Sarah

Sarah,

I believe this is in your area.

Thanks!

Subject: Well Status Question

Heidi,

I was given your contact information by Dee Findlay from Wexpro. If you are not the correct contact, please pass this on to the appropriate person.

We need some clarification concerning a Questar well listed below. We have BLM records showing that the well was plugged in 1996, yet we have indications that the well produced for a short while in 2002. Was the well re-entered? I would appreciate any light you can shed on this.

Operator Name	COGCC Operator Number	API State Code	API County Code	API Sequence Number	Well Name and Number	QtrQtr	Section	Township	Range
QUESTAR EXPLORATION AND PRODUCTION COMPANY	91800	05	067	05199	TRAIL CANYON 2-5	NENE	5	32N	8W

Thanks for your help.
