Lisa,

The COGCC is reviewing the Form 2A (#400188653) for the Great Western Oil and Gas Bower 10-24 location, located in the SESW Sec 10 T6N R67W Weld county, Colorado. The COGCC requests the following changes regarding the data submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA).

1. Depth to groundwater: Based on the water level for permit # 2309-F the depth to groundwater should be changed to 4 feet.
2. Sensitive Area Determination: Due to the presence of shallow groundwater and the presence of domestic water well within 660 feet the location is considered a sensitive area.
  - The sensitive area tab has been changed to "yes".
3. Conditions of approval: Based on the presence of shallow groundwater and the close proximity of a domestic well the following COA will apply to the Bower 10-24 location.
  - Location is in a sensitive area due to shallow groundwater; therefore drilling pits may not be utilized on the location.

Please feel free to contact me if you have any questions or concerns regarding the proposed changes or COAs related to this location.

Thanks,

Arthur
