BP Request for Exception Location
Colorado Oil and Gas Conservation Commission Regulation 603a(2)
Witt GU 34-23 #2: 1224.3 FSL; 2503.3 FWL Section 23, T34N-R8W
Witt GU 34-23 #4 1224.5 FSL; 2463.4 FWL Section 23, T34N-R8W

Dear Mr. Neslin:

BP America Production Company ("BP") is requesting an exception location be granted to Rule 603a(2) for its proposed Witt 34-23 GU #2 & #4 wells. BP is proposing to drill the Witt GU 34-23 #2 well & #4 well on a new shared pad. Colorado Oil and Gas Conservation Commission ("COGCC") Rule 603.a(2) requires a setback of 150 feet from the wellhead to the closest property line.

The Witt 34-23 #2 well is staked approximately 74 feet and the #4 approximately 73.9 feet from the property line of E. Perry and Georgianna Neil. This location was chosen by the surface owner to minimize impact to their irrigated pasture. The closest structure is approximately 650 feet from the proposed wellhead.

A waiver has been obtained from Mr. and Mrs. Neil, the surface owners of the encroached upon property line and is submitted with the Form 2.

Thank you for considering our request. Should you have any additional questions or concerns, please contact me at 970-335-3828.

Sincerely,

Patricia L. Campbell
BP Regulatory Analyst
