Re: No Further Action Request
Williams Production RMT Company
Pit Closure

Additional Investigation Report
PA 311-5 Workover/Skim Pit
COGCC Remediation Project REM # 5781
Location ID # 334700
Garfield County, Colorado

Dear Mrs. Blaney,

Colorado Oil and Gas Conservation Commission (COGCC) staff has reviewed the Form 27 Report with the results of additional investigations submitted by Williams on September 01, 2011, for the referenced site. Based on review of data presented, COGCC requires no further action at this time at this site. However, COGCC may require that further investigation and/or remediation be conducted at a later date should unforeseen conditions exist.

COGCC evaluates projects in a case by case basis. In general, Form 27s submitted after the Amended Rules were approved in 2009, must comply with the Amended Rules' Table 910-1. An exception is been made in this case, considering that Williams closed the pit in 2008 using the Table 910-1 criteria applicable at the time of pit closure. COGCC strongly recommends that Williams submits Form 27 work plans before closing the pits, and Pit Permits as required in section 903 of the Amended Rules.

The remediation projects will be closed in the COGCC database with the respective Form 27As. If you require any additional information, please call me at (970) 625-2497.

Sincerely,

Carlos Luján for
Chris Canfield, P.G.
Environmental Protection Specialist
