### 15. Comments:

This Location Assessment is for a stratigraphic test well for CO2 sequestration. This is a Department of Energy funded project with the University of Utah, Colorado Geologic Survey & Tri-State partnering to conduct the work at the Trapper Mine, located on state surface. Attached is a letter from the state as to surface use. Schlumberger has worked closely with the state and provided them with detailed plans for the project. Schlumberger also has negotiated an agreement as to use and reclamation with the Trapper mine. The well site is within a mined-out pit that has not been reclaimed and consists of areas of barren dirt and noxious weeds. Future use will be for the mining operations, as such no reference area has been established. After drilling this test well, the site will be fully reclaimed in the spring per agreements with the mine operator and the surface owner; only the plugged wellhead will remain. There are no plans to re-enter this well once completed and reclaimed. A Form 15 pit permit is being submitted concurrently with this location assessment.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
