**Subject:** Ute Mountain 111 corrections to Form 2  
**Date:** Tuesday, September 27, 2011 8:49:19 AM

---

Reference the PDOP reading. We noticed that the PDOP reading was missing from the Plat also and we called the surveying company and they looked at their notes and advised that the PDOP reading was 0.1 and we insert that number in our permit. Mr Henry Broadhurst is out of the office more than he is in and we just submitted without having the plat redone.

I am good with you removing the spacing Order number, unit acreage and unit configuration on the Honaker Trail since 318.a is a Rule, not a spacing order. You have my permission make these corrections on our permit. Thank you so much for your help. Patsy
