---

Arthur,

The change you have requested below is acceptable to us and we will comply with the COA.

Thank you.

Loni,

The COGCC is reviewing the Form 2A (#400208991) for the Augustus Lueking 14-32 5N45W location, located in the SWSW Sec 32 T5N R45W Yuma County, Colorado. The COGCC requests the following changes regarding the data submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA).

Due to the presence of the Valent sand, 15 to 45 percent slopes soil type the following COA will apply:

- Best management practices (BMPs) should be utilized to minimize disturbance of the vegetative cover while constructing and operating the location and to aid soil stabilization and revegetation of the disturbed area during interim reclamation. Cut and fill slopes should be minimized to the greatest extent practicable. The BMPs may include, but shall not be limited to, the use of mulches and/or tackifiers, erosion control mats and/or blankets, appropriate seed mixes and/or soil amendments and any other practices necessary to prevent soil erosion by wind and stormwater, and to encourage the growth of desirable soil stabilizing vegetation.

Please feel free to contact me if you have any questions or concerns.

Thanks,

Arthur
