Dear Mrs. Schwartzengraber,

Colorado Oil and Gas Conservation Commission (COGCC) staff has reviewed the documentation submitted by Chevron in October 2011 for the referenced site. Based on review of data presented, it appears that no further action is necessary at this time at this site. However, should future conditions at the site be discovered of contaminant concentrations in soils exceeding COGCC standards or if groundwater is found to be significantly impacted, COGCC may require that further investigation and/or remediation be conducted.

The remediation projects will be closed in the COGCC database with the respective Form 27As. If you require any additional information, please call me at (970) 625-2497.

Sincerely,

Carlos Luján for
