Subject: RE: Sundries for BHL moves RGU 41-1-298 Pad

Howard,

Please proceed with the proposed changes shown on Sundry Notices for the following wells (sent to COGCC Denver office on 11/1/2011, but not processed yet):

- 103-11438, Federal RGU 411-6-297
- 103-11436, Federal RGU 542-1-298
- 103-11435, Federal RGU 342-1-298

Verbal approval for these changes is granted, contingent upon the following assumptions:

- Production casing cement volumes shall be adjusted accordingly, such that coverage is sufficient to isolate all Iles and Williams Fork productive horizons plus at least 200' above top of the Mesa Verde Group top or the Ohio Creek Formation top (if present).
- The BHL and wellbore path remain at a legal location for completion (COGCC permitting staff will evaluate prior to formal approval of the Sundry Notice). If the BHL or the productive portion of the wellbore extend into locations that are not legal, then Williams may have to plug back portion(s) of the well that are not legal or obtain waivers from offset mineral interests.

Thanks,

David D. Andrews, P.E., P.G.

Subject: Sundries for BHL moves RGU 41-1-298 Pad

David

Attached are scanned copies of the remaining three sundries to move the BHL on the RGU 41-1-298 pad. Kevin gave verbal approval on the first two wells on the pad, we are requesting verbal approval on these three remaining sundries. If you are in agreement, would you respond to me, Greg and Kim so that we can relay to the rig.

Thanks on your part and sorry for the confusion,

Howard Harris
