Subject: RE: Gunnison Energy Pit 1-34 NFA

Facility #285417 API 05-051-06074 Spill #2215571 Remediation #5998

Based on review of information presented in Gunnison Energy's Final Field Summary Report and Form 27, via email on November 2, 2011, it appears that no further action is necessary at this time. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site. The Pit Location (ID#324484) has also been changed to "Closed" in the COGCC database.

Subject: Gunnison Energy Pit 1-34 Closure Report

Alex, enclosed is the GEC Pit 1-34 Closure Report with our findings and recommendations. Please let me know if you require any further information. GEC would like to begin backfilling the pit as soon as they get closure approval from COGCC.

Thanks,

Kenneth E. Miller, P.G.
