5. **DESCRIBE PROPOSED OR COMPLETED OPERATIONS**

OXY USA Inc. (Oxy) has completed reclamation of the above-mentioned reserve pit, and is submitting this form 4 sundry notice to request closure of the above mentioned reserve pit.

The sampling method Oxy employed was to take a representative random grab sample for each background sample location. The analytical concentrations table identifies the COGCC Table 910-1 concentration levels, Oxy's undisturbed background concentrations, and Oxy's post reclamation concentrations (Post REclaim 11/9/2009), and Oxy's fill/cap concentration (12/01/2009). Based on the cap sample concentrations meeting the COGCC's Table 910-1, Oxy's sundry notice requests to close this reserve pit.

To address elevated concentration of pH, Oxy buried and capped the pit bottom below at least three feet of native material to ensure a sufficient agronomic zone. The reclaimed pit was contoured to ve level with the pad grade to minimize stormwater runoff, during operational phase of the pad. Final pad reclamation will occur at the end of the life of the pad.
