Subject: Bill Barrett Corp, Kaufman Pad #5, 42A-24-692 Pad, NWSE Sec 24 T6S R92W, Garfield County, Form 2A (#400212708) Review

Mary,

I have been reviewing the Kaufman Pad #5, 42A-24-692 Pad **Form 2A** (#400212708). The 317B Surface Water Supply Area's External Buffer Zone Rules must be followed, with the completions pit requiring a pit permit and closure by Rule 905. COGCC has made the following changes to the Form 2A based on the Oil and Gas Location Assessment (OGLA) review.

1. **Water Resources (Section 14):** Form 2A indicates the distance to the nearest surface water is 514 feet. Due to the steep topography to the east of the pad location and distance to surface water, COGCC has designated this a **sensitive area**. COGCC has made this change.
2. **Water Resources (Section 14):** Form 2A indicates the depth to groundwater to be 80 feet bgs for a well located 617 feet from the proposed well pad, making this a **sensitive area**. COGCC's review of several nearby water wells indicated that the depth to groundwater in this area is approximately 30' to 60' bgs based on a Kaufman well to the south. COGCC has made this change.

If you have any questions, please do not hesitate to call me at (970) 309-2514 (cell), or email. Thanks.

Dave
