Therefore some of the fluids have migrated into the underlying soil and bedrock.</u>	

CORRECTIVE ACTION

Describe immediate response (how stopped, contained and recovered): No further migration of fluids into the underlying soil is occurring. The pit has been drained prior to closure. Sampling has been performed to assess the impacts from the release.

Describe any emergency pits constructed: None were constructed

How was the extent of contamination determined? Field measurements of the pit boundary plus soil samples have been collected from soil beneath the bottom of the pit and the pit walls.

Further remediation activities proposed (attach separate sheet if needed): Refer to the submitted and approved pit closure Form 27 (Remediation # 5948).

Describe measures taken to prevent problem from reoccurring: Leakage will not occur again as the pit is being permanently closed.
