Mr. Gonzales,

The COGCC has reviewed the information in the closure request submitted by Kleinfelder on behalf of Vaquero Energy on 10/17/2011, as well as the revised Form 27s submitted on 12/6/2011. Based on COGCC review, it appears that no further action is necessary at this time. However, due to elevated SAR levels detected in soils, it should be noted that these cases could be re-opened in the future. Should future conditions at the sites indicate contaminant concentrations in soils exceeding COGCC standards, or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the sites. The Form 27s have been approved and closed (each with a Form 27a as noted above), and the status of each pit has been changed to closed. Please retain a copy of this email as verification of COGCC concurrence with the closure request.
