Arthur-

Paul Dechant is the leasee on the Agriculture lease on section 16. Obviously we can't land spread on Section 16, but Paul has a lot of pasture land in the immediate area, and we pay him to spread on his lands. I don't yet know specifically where though....something we'll figure out once Paul tells us where he would prefer we spread, and where access at the time is not restricted due to moisture.

Do I need to know specifically at this time? If so I am 80% sure it will be the N/2 of Section 4-14s-47w. This is a spot we have used in the past.

Matt,

The COGCC is reviewing the Form 2A (#400243739) for the Vecta Huron State 21-16 location, located in the NENW Sec 16 T14S R47W Cheyenne County, Colorado. The COGCC requests the following changes regarding the data submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA).

Construction

Mud disposal is stated to be offsite land spreading; could you please specify where and how the mud will be disposed?

Conditions of approval

Location may be in a sensitive area due to shallow groundwater; therefore if drilling pits intercept groundwater the pit must be lined or a closed loop system used.

If you have any questions or concerns please feel free to contact me.

Thanks,

Arthur
