Bob,

I have completed preliminary review on the Form 4 you submitted in support of the APD to re-enter this well. I spoke with Arthur Koepsell, the OGLA for this area, and he said that he agrees with your evaluation that a Form 2A is not required because limited surface disturbance that is anticipated. The Form 4 and Form 2 are in the engineering review queue now.

Please feel free to call if you have any further questions.
