Please see attached.

We've recently re-sampled, but this is the most recent analysis we have at the current time.

Thanks.

Jess,

Where is the analytical data characterizing the waste water?

Subject: Form 4 Submittal - Water Reuse & Waste Minimization - Axia-Laramie II

Mr. Fischer & Ms. Spry O'Rourke:

Per our discussion this week, please find the attached Form 4 submittal concerning water transfer between Axia Energy LLC & Laramie Energy II LLC. Since it doesn't appear that the

Form 4 is able to be electronically filed, we will be submitting this in hard copy this morning, but I also wanted to send you an electronic version due to special circumstances.

Axia Energy will be ready to transfer fluid to Laramie Energy II starting Monday, 2/6/12. The main point of urgency is that it has been voiced by the community in/near the Town of Collbran that truck traffic be kept to a minimum. Approval of this sundry as soon as possible will allow both Axia Energy and Laramie Energy II to accomplish the goal of minimizing truck traffic, conserving fresh water in the immediate area, and optimize water resources available.

Enclosed in the sundry is:

Form 4

Form 4 Tech Info Page – with specifics and ID's of locations of transfer

Axia & Laramie's signed Produced/Flowback Water Reuse and Waste Minimization Plan

Axia & Laramie's signed Water Custody Transfer Agreement

Record of Water Transfer Form to be utilized to document transfers

You will find that the attachments to the sundry are similar, if not identical, to a previously approved submittal to the COGCC. This was done in an attempt to expedite approval. Laramie Energy II will also be submitting similar documents today.

If at all possible, please contact me as soon as possible at (303) 349-6026 to discuss the matter, and to give us an idea as to when approval could possibly be anticipated.

Thank you for your urgency and consideration in this matter.

Sincerely,

Jess A. Peonio
