Inspector Comment:

Met PDC representatives at 9AM at tank battery where remediation #6786 is in progress. Booms in pond and discharge area of pond show no evidence of any free oil staining and no evidence of any oil observed on water of pond or in discharge. Ice immediately adjacent to excavation may have very minor oil stain or just minor brown stain spots (visual appearance does not look like oil). Excavation actions (part of remediation) still planned for approx 2 foot section of "bank" adjacent to TD as soon as weather conditions are conducive for work. PDC will collect another set of surface water samples in pond adjacent to TB and in drainage to evaluate current conditions. Walked northern side of pond (where accesable) to look for dead duck(s). No dead ducks observed. Ample evidence of recent water fowl hunting (numerous recent shotgun shells litter pond banks).
