JB,

In reviewing this Form 6 Subsequent Report of Abandonment I have the following questions. I've placed the form on hold awaiting your response.

1. Provide a Form 4 Sundry notice documenting P&A activities. There is no required Form 6 Notice of Intent to Abandon in the file. Based on conversation with Mike Leonard, he was in contact with Renegade personnel during the re-entry/abandonment of this well. In this case COGCC requests a Form 4 Sundry notice with a narrative explaining what was done to plug and abandon the well, and the logic behind field decisions.
2. There is no well-bore diagram attached showing final configuration. Please email to my attention and I will upload to the file.
3. The casing history portion of the Form 6 must be completed with at least surface string information. I can update the Form based on information you provide.
4. Production reports are missing for 2009 thru one month post-plugging. I understand you are working with Cory on this, so I've copied her on this email.
5. If available, LAS version of logs should be uploaded to the COGCC website.

If you have any questions you can contact Dirk Sutphin at 5107 about engineering issues, or feel free to call me at any time.

Thanks,

*Nancy K. Prince*
