**Subject:** Memo to File for PDC Nolte 14-44, API 05-045-074822, Spill 2606749

**Importance:** High

Hi Chris,

I've closed PDCs Nolte 14-44 as discussed, following their submission of the form 4 for arsenic background issue. During our teleconference with Herman Lucero on 2/14/2012, you noted that I should put a memo to the file indicating that inadvertent communication between PDC and COGCC resulted in PDC not running samples for SAR, pH, and EC; however, the submitted info is adequate and the spill can be closed.

Thanks,

Annie

**Subject:** PDC Nottle 14-44

**Importance:** High

Ann/Chris;

Based on a telephone call between HRL Compliance Solutions, Inc. (HCSI) and COGCC representatives (Ann and Chris) which took place on February 14, 2012, HCSI is forwarding the attached Form 4. Specifically, the Form 4 addresses an email from Ann to Adell requesting additional information for closure of the Nolte 14-44 produced water release which occurred in April 2010. The reference email is dated February 8, 2012. The items in the email are addressed below and in the attached Form 4.

1: During the telephone conversation, Chris Canfield agreed that no further action would be required concerning inorganics, i.e.; EC, SAR, and pH.

2: The attached Form 4 addresses the request for additional background arsenic data.

I can be reached at the number listed below for further concerns or clarification.

Regards;

Herman Lucero, REM
