THE PRODUCTION LINER WILL BE HUNG OFF INSIDE 7" CASING. UNIT CONFIGURATION = S/2N/2, N/2S/2. WELL IS TO BE TWINNED WITH APPROVED BILL E36-67HN. NOBLE WILL UTILIZE A RIG WITH HEIGHT IN ACCORDANCE WITH RIG HEIGHT RESTRICTION FOR SENSITIVE IMPROVEMENT= CR 47 @ 225'. THIS PERMIT IS FOR AN UNPLANNED SIDETRACK. JIM PRECUP NOTIFIED BY DRILLING ENGINEER @ 9:36 AM ON 2/26/12. While drilling the lateral out of the 7" shoe the MWD was not seated correctly and therefore was not oriented in the right direction so we ended up drilling in the wrong direction. We slid straight up when trying to slide straight down. The last survey was 99 degrees @ 7500' MD and the rig drilled to a depth of 7559' MD. At this point the decision was made to perform an open hole sidetrack to get back to the original target depth. The open hole sidetrack was performed by drilling straight down very slowly starting at a depth of 7328' MD, leaving 231' of the original hole open. SURFACE CASING & 1ST STRING LISTED IN CASING = ACTUALS.

### BMP

<u>Type</u>	<u>Comment</u>
Material Handling and Spill Prevention	Spill Prevention Control and Countermeasures (SPCC) plans are in place to address any possible spill associated with Oil & Gas operations throughout the state of Colorado in accordance with CFR 112.
General Housekeeping	Housekeeping will consist of neat and orderly storage of materials and fluids. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite, suitable facilities. If spills occur prompt cleanup is required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal or recycling. There will be no major equipment overhauls conducted onsite. Equipment will be transported offsite for major overhauls. Cleanup of trash and discarded materials will be conducted at the end of each work day. Cleanup will consist of patrolling the roadway, access areas, and other work areas to pickup trash, scrap debris, other discarded materials, and any contaminated soil. These materials will be disposed of properly.
Storm Water/Erosion Control	Stormwater management plans (SWMP) are in place to address construction, drilling and operations associated with Oil & Gas development throughout the state of Colorado in accordance with Colorado Department of Public and Environment (CDPHE) General Permit No. COR-038637. BMP's will be constructed around the perimeter of the site prior to, or at the beginning of construction. BMP's used will vary according to the location, and will remain in place until the pad reaches final reclamation.
