<p>Provide a detailed description of the incident, problem and cause (equipment failure, human error, etc.):</p> <p>Routt County asked for assistance from COGCC of clean-up and compliance of this well site in August 2011. An official complaint form was not filed at that time due to COGCC contacting True Oil. Due to a recent inspection showing continued non-compliance and new concerns at the site a complaint form is being submitted. Site inspection shows: Interim reclamation not still not completed, pit still not reclaimed and is again filled with water and oily residue - no liner could be seen, fence down, erosion on stock piles which is traveling into pit, erosion beginning along edges of well pad - no BMPs for erosion along pad. No adequate containment area (recent scraping of dirt around holding tanks); containment area not lined - oil from tanks leaking in containment area, FRAC TANKS - top hatches open, terrible odor in area, frac fluid leaking from top hatch travelling down tank and onto ground. Routt County asked for assistance in clean-up and compliance of this area in August 2011. Trash has been removed but nothing else completed. Pictures can be emailed</p>
