Gage:

Looks good. Encana can delay the CBL on this well.

I'm "cc"ing Mr. King - whom, as you know, was the COGCC contact for CBL deferments. He is going to be out of the office beginning later this week until early June, so continue to send the CBL deferment requests to me until then.

Regards,

Jay Krabacher

Well was cemented with no issues. Temp log was ran in lieu of CBL. Bradenhead pressure will continue to be monitored until rig is off of the pad, at which time a CBL will be run. Temp log is attached. Annulus was remaining full and static for 4 hrs before setting slips.
