Rick,

Ok. That works for us. Thanks for clarifying with me.

Go ahead and enter that condition for future use.

Thanks again

Ok. So no letter needs to be submitted to the director as of yet, just if in the future they wish to change the use of pit?

Is that correct?

The point is that if the operator decides in the future they want to use the pit for additional wells, then we have a trigger to review this because the use of the pit is changing from its original intent - increase flow of produced water, a possible change in water quality.

I'm not entirely available via phone, but if that doesn't help I can try to give you a call.

Rick,

Could you give me a call to discuss this? I just want to be sure I understand.

Thanks

Kristi McRedmond

**Subject:** RE: Green 1-7 Facility Form 2A 400280807

Kristi,

I would like to apply the following condition to the Green 1-7 Facility Form 2A: "A Form 26 Source of Produced Water for Disposal requesting a change to the source of produced water for the production pit must be submitted to the Director for approval prior to adding additional wells to the existing production pit (reference Facility ID 297227)."

In addition, I will add 1 production pit to the facilities list on the Form 2A. I don't have any other questions regarding this location.

Rick

**Subject:** RE: Green 1-7 Facility Form 2A 400280807

Rick,

I spoke with the operator about their plans. The pit will stay open and facilitate the existing well. The produced water tank will be used for the three new proposed wells.

If you have any other questions, feel free to contact me.

Thanks

Kristi,

Will the operator also use the tanks for the existing Green 1-1. If so, do they have plans to close the pit?

Thank you  
Rick

Rick,

I spoke with the operator and they plan on using the produced water tank for the new wells. So the produced water will be stored in the tank and disposed of offsite.

If you need anything else, please let me know.

Thanks

**Subject:** Green 1-7 Facility Form 2A 400280807

Kristi,

I am reviewing the Form 2A location assessment for the Diversified Operating Corporation Green 1-7 Facility location. There is an existing production pit on the location. I see the Form 2A includes a water tank as part of the facilities. Can you tell me what DOC plans are for handling produced water at this location? Will the three new Green wells be served by this production pit, or will the produced water be stored in tanks for offsite disposal?

Thank you,  
Rick
