Subject: RE: CBL Deferment Request

Gage:

Encana can delay the CBL on this well.

For future reference – usually I receive not only a copy of the entire temperature log, there is also a “one-page” condensed version. This one-page version is almost always fairly easy to interpret the T O C. That was not provided this time. Perhaps Encana could ask the logging company (Warrior Energy Services) to also provide that in the future?

Regards,

Jay Krabacher

Subject: CBL Deferment Request

EnCana CBL Deferment Request

Well Name:	HMU Federal 21-1B
API Number:	05-045-20409
Pad Name:	J16W
Plug Bump Date:	5/11/12
Plug Bump Time:	22:01 Hrs
Top of Gas:	8044' MD
Designed TOC:	5682' MD
Temp Log TOC:	5700' MD

Bradenhead Pressure Report

Time	Bradenhead Pressure
6 hours	0 PSI
12 hours	0 PSI
24 hours	0 PSI
48 hours	0 PSI
72 hours	0 PSI

Comments:

Well was cemented with no issues. Temp log was ran in lieu of CBL. Bradenhead pressure will continue to be monitored until rig is off of the pad, at which time a CBL will be run. Temp log is attached. Annulus was remaining full and static for 4 hrs before setting slips.
