Based on review of information presented in your letter dated May 24, 2012, it appears that no further action is necessary at this time, and Remediation Project #6705 has been closed with a Form 27a (document #200352928). However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards, or if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site.
