Hi Rick,

I was able to catch my surveyor before he went on vacation for three weeks! Here is the updated Access Road Map.

Thank you,
Liz

Hi Rick,

For the tank battery location, since it is touching the disturbed area, I would like to included it with the 2A that you are currently reviewing. I will submit an abandon location sundry and forward you a copy. Please keep the facilities on the 2A.

As for the Access Road map, I will have to get a revised one from my surveyor who is on vacation currently but I will get it to you as soon as possible.

Thank you,
Liz

Liz,

I am reviewing the Form 2A location assessment for the Magnuson SW-23 Pad location, and request the following changes:

1. The Access Road Map needs to show the access road from the County Road to the proposed location. Please submit a revised Access Road Map.
2. It appears the tank battery for these wells has also moved. Please submit a Form 2A to amend Location 428224 to change its location and update the planned facilities.
3. Since the production facilities will be accounted for on a separate Form 2A location assessment, I propose removing all facilities except the four wells.

4. NRCS Soil Map Units: I changed the NRCS soil map units on the Form 2A to the 24: Fort Collins loam, 1 to 3 percent slopes and 32 Kim loam, 1 to 3 percent slopes. This matches the original approved Form 2A.

Please contact me with any questions.
