Dave,

This well was drilled in 2005 and there was no integrity test done. The maximum MW was 11.2 and a TD of 7535'.

If you need anything else, please feel free to contact me.

Thanks,
Ed

Ed,

Did PDC perform a FIT or LOT after drilling out of the surface casing on this well? If so, what was the EMW? What was the MW at TD prior to running the production casing?

Thanks,

Dave

Ed,

What was the initial bradenhead pressure prior to opening the valve? "Surface Casing" is blank for Item 14 (Step 1: Existing Pressures).

Thanks,

Dave,

Attached is the Form 17 for the Braden head test. The test was completed on 19 December 2011 @ 13:00 by Jim Lake with PDC and witnessed by myself and Mike Longworth.

If you have any questions, please feel free to contact myself or Jim Lake.

Respectfully,
Ed Winters
