Date: Thursday, June 14, 2012 11:29:51 AM

Amber,

Please upload this email to:

- Location ID # 317032
- API # 121 06776
- REM # 7091
- Pit Facility ID #s 101055 and 101056

Gene,

COGCC has assigned the **remediation # 7091** to the Form 27 pit closure remediation work plan submitted by Friezler Enterprise on Feb 27, 2012 for the pit closure on the Gebauer 1 site. Please notify the COGCC when final installation of the tanks is completed and pit areas have been contoured, graded and reseeded, to program a final inspection and eventually close the project. **Please don't forget to mention REM # 7091.**

1. Spill report # 2523453 has been closed.
2. Pit Facility ID #s 101055 and 101056 status have been changed to closed (CL).
3. NOAV # 200273766 will be closed as well.

Thank you,
Carlos

Carlos,

They have closed all of the pits at the location. There was a skim pit and water pit. You can go ahead and change both pits (101055 & 101056) in the data base to closed status. Please include a comment referencing the associated remediation project #. Thanks again for following up on this one.

John

Subject: Friezler Resources-Gebauer 1 _ Form 27 pit closures

Amber,

Please enter and upload the attached approved Form 27 and link to:

- Location ID # 317032
- API # 121 06776

Please copy Mr. Gene Fritzler (gfritzler@bresnan.net) , John, and myself with the Remediation number (REM #).

Thanks!

Gene,

John Axelson approved the Form 27 work plan for the pit closure of the evaporation and skim pits at the Gebauer 1 site.

- We will close the Form 19 Spill report # 2523453.
- We will close the NOAV # 200273766 as well.
- Please notify COGCC when contouring and reseeded has been completed and ready for final inspection.
- The Project will be closed in COGCC database as soon as we get the report of satisfactory inspection.
- Please use the Remediation number (REM #) that you will receive from our Data Entry personnel for future communications related to this project (it facilitates enormously COGCC's staff work).

Note: I have a question regarding the pits.

There are two pit permits associated to this site, Pit Facility ID # 101055 and 101056. There is no record in the database indicating what type of pits they are. Fritzler Resources is closing an evaporation and a skim pit. Are these pits the same ones as 101055 and 101056? Or asking the question differently, how many pits are there at the Gebauer 1 site? To make sure we close the appropriate pits in the database.

Thank you much,
Carlos
