

Geologist Information

General: New location; 14 new wells
 Ownership: Lantz surface/fee minerals
 SUA Status: Have
 Spacing Units: SE/4 spacing unit
 Adjacent Owners: Ledezma

Plan of Development

Access: Use existing access from CR – will need to modify for rig traffic slightly.
 Drilling: Efficiency rig
 Cuttings: On surface in cuttings management area.
 SIMOPS: Yes
 Completion: Frac from adjacent frac pad. Frac water tanks to be stored on adjacent frac pad as well as on the SG 32-26 pad for water storage. Water will be pumped to the frac pad through a 10" poly line. Water will be trucked to the SG 32-26 pad. The poly line will lie on top of the existing 2-track.
 Flowback: On pad
 Prod Equip: Production Equip to be on pad in south east corner.
 Pipeline: New 8" gas and possibly a 4" water line to be installed. Pipeline to follow route as shown and tie in at access road to SG 41-26.
