Subject: RE: Approved Sundry 2215975

Dear Linda,

Thank you for the review on the Sundry requesting closure of the Mitchell 32-6 Pad reserve pit. As requested, we are providing you with the following clarifications.

The Sundry Form 4 identifies API number 05-077-09085 which corresponds to the Mitchell 32-4 well, which is located on the Mitchell 32-6 pad. When we originally submitted the sundry, we utilized the Facility ID number "334551", which corresponds to Oxy's Mitchell 32-6 pad. The COGCC score card bring up seven wells, the first being the Mitchell 32-4 (05-077-09085-00). Since we were focusing on the reserve pit closure we, only meant to provide the well API # 077-09085 as an additional reference number only. We will make sure to minimize confusion on future submittals by using the using the facility ID.

We made a cut and paste error on Oxy's internal memorandum to file; as you have correctly described, both the Mitchell 32-4 and Mitchell 32-6 are in the same quarter-quarter section, specifically SENW Sec 32, 9S2 94W. We have corrected the memorandum to reflect the correct legal location. It has been attached for your records.

Once again we appreciate the thorough review that you have provided on our submittals.

There may be other submittals with similar issues that have already been submitted to your office. We will work on improving our review process to make sure you receive cleaner documents in the future.

Thanks and Happy Fourth of July,

Daniel

Subject: FW: Approved Sundry 2215975

Hi Daniel,

Further review of this sundry notice identifies some conflicting location information that needs to be straightened out for our database system. I would appreciate your assistance in clarifying the api and well name for the pit sample data submitted, as well as the location information.

The Sundry Form 4 identifies API number 077-09085 and well Mitchell 32-6, located in the SENW Sec 32, 9S, 94W.

The API number 077-09085 is for Mitchell 32-4, and the sundry was edited to reflect that. Both Mitchell 32-4 and Mitchell 32-6 are in the same quarter-quarter section in our database, SENW Sec 32, 9S2 94W.

However, the attached memorandum to the file, dated 7/6/2011 states that the Mitchell 32-6 pad is located in NWNW Section 10, 10S, 94W

Thanks for your assistance.
