Hi Rick,

New locations are being currently planned for the 1 well (Thornton 15F-232) and the location in the NWNW, but we are not yet ready to submit the permits. At this time, the 2A for the Danielson Pad is only for the Danielson location and I agree with your assessment that there should be no facilities on this location but instead be included with the Thornton 15F-232 location, when it is submitted.

Thank you,
Liz

Subject: Danielson 15G-HZ Pad Form 2A 400309398

Liz,

I will not be in on Friday, so here are my comments regarding the Danielson 15G-HZ Pad Form 2A.

1. The location is in a Sensitive Area due to the presence of shallow ground water. I changed the Sensitive Area designation to Yes.
2. The Location Drawing and facilities list show that you intend to include a production facility just north of the well pad on this Form 2A. The Multi-Well Plan shows a fourth well not included on this Form 2A to be near the production facilities. What are your plans for submitting the additional Form 2As and APDs for the wells in the north ½ of the section? I think we will need three locations: 1. This Danielson 15G-HZ Pad with 3 wells and no facilities; 2. A new location with 1 well (Thornton 15F-232) and the production facilities; and 3. A new location with the 4 wells shown planned for the NWNW ¼

Thank you,
Rick
