

ENGINEER'S DAILY REPORT

Project: DeBeque Plugging Project (PHA-1116)  
Date: 04/03/2012

Personnel On Location

COGCC:	Kevin King	7:00 AM	7:30 PM
	Linda Spry O'Rourke	7:30 AM	8:30 AM
RACS:	Jason McKinney	7:00 AM	7:30 PM
	Toby Steen	7:00 AM	7:30 PM
	Al	7:00 AM	7:30 PM

Weather: Cloudy (AM), M. Sunny (PM)  
Calm (AM), Breezy (PM)  
30's - 50's (AM), 50's - 60's (PM)

Work Summary

RACS crew has spent the last few days cementing the cellar in place to stabalize the surface location from washing out from under the rig.  
Finish removing equipment from Pasture pad to get out of the way for the construction contractor to mob there equipment and begin work.  
Rig back up on Buckeye well and resume drilling with casing advance system.  
Casing drilled down to 40'.  
Bubbling inside cellar keeps moving around as we drill. It seems to be consolidating around the outside of the casing, but not inside.  
Shut down for the night.

Measurement and Payment

Item No.	Description	Units	Unit Cost	Work Performed Today	Percent/Units Complete	Total Approved
1	Mobilization and Demobilization	LS	7500		100.0%	7500
2	Rig Hours	Hr	380		160	60800
3	Cement	Sacks	22	186 Sacks Cement used for cellar stabalization	1548	34056
